

Statement of purpose

I am XXXX permanent resident of Helu, Syangja, Nepal. Regarding my academic background, I have done my S.L.C (School Leaving Certificate – 10 years of education) in 2010 at XXXX ,Jhapakot Syangja with 56.38% and my 10+2 (Higher Secondary Education) in 2012 XXXX, with 48.60%. My purpose of this application is to apply for Bachelor of Science in Accounting in XXXX.

Because of my huge interest in management and accounting since my school days and researching about business corporate and status in my country I have come to know many successful business personalities, who are working in major companies and having qualified skills and I have also found out that a great number of people have graduated from abroad. And studying abroad is also important from the academic point of view that we can have international recognized degree. Therefore, I have also decided to go abroad for higher studies with the agreement of my family and come back to Nepal to have a successful career in business field.

USA is an English speaking country as it provides the perfect training and environment to achieve my entrepreneurial ambition. United States studies are well known for its best quality education and students from all over the world are studying there, leading their future to success. Also, there are many friends and acquaintances of mine suggesting me to go to USA if I am to continue studying further. Apart from the great destination to study, I believe it is also a fantastic and safe place to live in, providing a welcoming and multicultural society originating people from across the globe. For many international students, United States is a better study destination than other popular alternatives like the UK, Australia and Canada due to its highly organized education system. After my graduation in USA, I will be able to get job relevant to my study anywhere in the world as an Accountant.

After careful consideration, it has become clear to me that developing a successful career in the modern business environment requires advance training. I am motivated to study Bachelors of Science in Accounting by an awareness of the ever-changing reality of the business environment and the need to upgrade my own expertise and professional abilities. Many scholars from my country have studied abroad to hone their skills with foreign teachers and classmates. And the current condition of my country in the field of Business is not enough as per the demand of students. We have some growing Universities and Colleges but we are lack of opportunity to join with them in right time, it is not fixed till even we complete CMAT exams

and university entrance exams. I hope to follow suit broadening my international perspective, improving my language skills and refining my knowledge of business Account.

The information I received from your website has made me realize that XXXX is the best choice to do my advanced study. I found detail regarding its education type, faculty, culture, cost, location and many more. As it provides the high quality of education with effective cost I choose XXXX as a best option. I will feel luckier if I get a chance to study in this prestigious university, So that I can fulfill my dreams and I will have a challenging career and I will be able to utilize my extensive background in managing, while learning additional skills and techniques. I hope to use my skills and background to learn how to effectively analyze and solve business problems. My goal is to work under some of the reputed multinational companies in Nepal and establish myself in the competitive business world.

Talking about New York City, it is the densely populated city of USA among the world major commercial, financial and Cultural Centers. International students get a chance to understand Americans and appreciate New York City, while building mutual goodwill in an increasingly globalized world. It is well developed city in America with high quality of life standard. As I have decided to study and live there I will have good opportunities to be a part of this beautiful city. I will have easy access of transportation from my accommodation to the University.

Only 5 accredited universities are available in Nepal for which competition is very tough to get admissions. Also we have to pass through various entrance exams which are the derivatives of American College Testing(ACT), Graduate Record Examination(GRE), Graduate Management Admissions Test(GMAT), Scholastic Aptitude Test(SAT). These take a lot of time to do. Even we passed and got admissions in college, education is not globally recognized. Also education in Nepal is only theoretically based due to which we cannot gain proper knowledge regarding in the practical fields. Modern technologies and facilities are not available in college, all what we learn is in same traditional method which is not recognized in any other countries except Nepal. Exams in colleges are not properly timed in Nepal due to which students need to face problem every time. Most of the universities in Nepal are yearly based instead on semester basis due to which students feel difficult to attend exams. Also we need to struggle in Nepal with the degree what we gained in Nepal. So I have chosen to study in USA to gain proper education so that I can help my nation to move forward.

Further I would like to say that my family has sufficient funds to support for this course. The expenses and fees required for my stay in America for study will be sponsored by my family. The source of sponsorship will be the bank balance of my brother.

After I graduate from your program, I will be uniquely prepared to face the challenges of the international business world. I plan to return back to Nepal, where the fast-developing economy requires experienced management professionals. I will be able to work as an Accountant in reputed banks such as Nabil Bank, Agriculture Development Bank and so on. Agriculture Development Bank is Government owned bank and xxxl bank is one of the top Commercial bank in Nepal .They provides good facilities to their Staff such as competitive remuneration, travelling allowance, Festival Bonus, Insurance, loan (house, car ,staff's children education etc).As Agriculture Development Bank is the Government bank it provides the pension and other facilities after retirement also. So I plan to use my experience and management background to assist in the structured development of commercial sector. Your program in Bachelor of Science in Accounting will enable me to achieve the goals I have set for myself. I expect to have a long career in this field.

Hoping and looking forward for best consideration.

Yours sincerely

XXXX
